Extruding fridge stripe

Dry pressing ferrite magnet

Injection ferrite bonded

Injection NdFeB bonded

Injection SmCo bonded

### Magnetic compound for Extruding fridge stripe

YXF Brand Strontium Plastic Bonded Ferrite Magnetic compound are suitable for making various bonded magnets. They have good compatibility with different kinds of composite materials, such as nylon, resin, polyvinyl chloride and rubber etc.. Due to the large particle size, such powders have high filling capacity. They can be used for making different kinds of magnets by extrusion or infecting moulding. The strict quality control system of our plant ensures that the quality is stable and consistent.
